VOLUME CONTENTS

Numbers 1–2

H. W. Lo, S. Kaldor and P. Venuvinod	1	A "broad-brush" approach to the selection of general purpose cutting tool geometry for maximum tool life
N. Gautam and V. K. Jain	15	Experimental investigations into ECSD process using various tool kinematics
In-Hyu Choi and Jeong-Du Kim	29	Electrochemical deburring system using electroplated CBN wheels
Xun Chen, W. B. Rowe, B. Mills and D. R. Allanson	41	Analysis and simulation of the grinding process. Part IV: effects of wheel wear
M. J. Kaiser	51	Tube separation functionals
A. A. El-Domiaty and A. A. Elsharkawy	75	Stretch-bending analysis of U-section beams
Jeong-Du Kim and Eun-Sang Lee	97	Surface characteristics on the ductile mode grinding of MgO single crystal with optimum in-process electolytic dressing system
R. Stevenson	113	The measurement of parasitic forces in orthogonal cutting

Number 3

S.-T. Chiou, G.-J. Bai and W.-K. Chang	131	Optimum balancing designs of the drag-link drive of mechanical presses for precision cutting
M. C. Malburg, D. G. Chetwynd and J. Raja	143	The robust detection and removal of unwanted asperities in applied surface metrology
K. C. Fan, M. J. Chen and W. M. Huang	155	A six-degree-of-freedom measurement system for the motion accuracy of linear stages
Zhang Deyuan and Wang Lijiang	165	Investigation of chip in vibration drilling
R. Sarma and D. Dutta	177	Tool path generation for NC grinding
Lu Changhou, Ai Xing and Li Jianfeng	197	Analysis and research on spiral oil wedge hydrodynamic bearing for precise machine tool spindles
Chih-Ching Lo and Chao-Yin Hsiao	205	A method of tool path compensation for repeated machining process
F. Abrari, M. A. Elbestawi and A. D. Spence	215	On the dynamics of ball end milling: modeling of cutting forces and stability analysis

Number 4

T. B. Thoe, D. K. Aspinwall and M. L. H. Wise	239	Review on ultrasonic machining
T. W. Liao	257	Flexural strength of creep feed ground ceramics: general pattern, ductile-brittle transition and MLP modeling
Rong-Shean Lee and Chen-Hua She	277	Tool path generation and error control method for multi-axis NC machining of spatial CAM
Chung-Shin Chang	291	Turning of stainless steel with worn tools having chamfered main cutting edges

R. Y. Chiou and S. Y. Liang 315 Chatter stability of a slender cutting tool in turning with tool wear effect

S. O. Onuh and K. K. B. Hon 329 Optimising build parameters for improved surface finish in stereolithography

D. E. Dimla Jr, P. M. Lister and N. J. Leighton 343 Automatic tool state identification in a metal turning operation using MLP neural networks and multivariate process parameters

F. Erzincanli, J. M. Sharp and S. Erhal 353 Design and operational considerations of a non-contact robotic handling system for non-rigid materials

P. A. Cauchick-Miguel and T. G. King 363 Factors which influence CMM touch trigger probe performance

M. J. Kaiser 375 Generalized zone separation functionals for convex perfect forms and incomplete data sets

Numbers 5–6

SPECIAL ISSUE
THE SEVENTH INTERNATIONAL CONFERENCE ON
METROLOGY AND PROPERTIES OF
ENGINEERING SURFACES

R. J. Crafoord v Introduction

KEYNOTE SPEECHES

T. R. Thomas 405 Trends in surface roughness

J. Westberg 413 Opportunities and problems when standardising and implementing surface structure parameters in industry

T. V. Vorburger, R. G. Dixson, V. Tsai, T. Doi, J. F. Song, T. B. Renegar and J. Fu 417 Problems in surface metrology

SESSION 1a: MANUFACTURING

F. Klocke and J. Liermann 419 Roller burnishing of hard turned surfaces

N. Amini, B. G. Rosén and H. Westberg 425 Optimization of gear tooth surfaces

K. H. Wang, L. A. Blunt and K. J. Stout 437 The 3-D characterisation of the surface topography of the ballizing process

SESSION 1b: MANUFACTURING AND FORM

K. Sasajima and T. Tsukada 445 A development of three-dimensional surface measurement on cylinder

M. A. Mosaad 451 Visual comparators of propeller surface roughness

M. Jonasson, A. Wihlborg and L. Gunnarsson 457 Analysis of surface topography changes in steel sheet strips during bending under tension friction test

H. K. Tönshoff and A. Mohlfeld 469 Surface treatment of cutting tool substrates

U. Skands, P. Wahlberg, L. H. Christensen, B. Palfelt, L. Borregaard, N. B. Alexandersen, T. Johansen, A. Rønning and J. C. Russ 477 Surface analysis of injection molded TV components

SESSION 2a: TRIBOLOGY

U. Olofsson and S. Björklund 485 3-D surface analysis of worn spherical roller thrust bearings

S. A. Chizhik, A. V. Goldade and N. K. Myshkin 495 Levels of topography in mechanics of precision joints

J. L. Andreasen, N. Bay and L. De Chiffre 503 Quantification of galling in sheet metal forming by surface topography characterisation

K. Váradi, Z. Néder, T. Bercsey and B. Palásti Kovács 511 Contact and thermal analysis of bronze and steel machined surfaces in sliding contact

SESSION 2b: TRIBOLOGY & MULTIPROCESS SURFACES

B.-G. Rosén, R. Ohlsson and T. R. Thomas 519 Nano metrology of cylinder bore wear

H. Sannareddy, J. Raja and K. Chen 529 Characterization of surface texture generated by multi-process manufacture

SESSION 3a: CHARACTERISATION

J. M. Burrows and B. J. Griffiths 537 A vector modelling technique for the representation of 3-dimensional surface topography

C.-C. A. Chen, W.-C. Liu and N. A. Duffie 543 A surface topography model for automated surface finishing

D. Blackmore and G. Zhou 551 A new fractal model for anisotropic surfaces

SESSION 3b: CHARACTERISTION

P. J. Scott 559 Foundations of topological characterization of surface texture

J. C. Russ 567 Fractal dimension measurement of engineering surfaces

C. Roques-Carmes, J. F. Quiniou, N. Bodin and G. Monteil 573 Geometrical description of surface topography by means of an equivalent conformal profile model

S-H. Lee, H. Zahouani, R. Caţerini and T. G. Mathia 581 Morphological characterisation of engineered surfaces by wavelet transform

E. Mainsah and D. T. Ndumu 591 Neural network applications in surface topography

SESSION 3c: CHARACTERISATION

I. Sherrington and G. W. Howarth 599 Approximate numerical models of 3-D surface topography generated using sparse frequency domain descriptions

M. Pfestorf, U. Engel and M. Geiger 607 3D-surface parameters and their application on deterministic textured metal sheets

SESSION 3d: CHARACTERISATION

H. Zahouani 615 Spectral and 3D motifs identification of anisotropic topographical components. Analysis and filtering of anisotropic patterns by morphological rose approach

M. Dietzsch, K. Papenfuß and T. Hartmann 625 The MOTIF-method (ISO 12085) – a suitable description for functional, manufactural and metrological requirements

C. A. Brown, W. A. Johnsen and K. M. Hult 633 Scale-sensitivity, fractal analysis and simulations

H. Trumpold and E. Heldt 639 Why filtering surface profiles?

SESSION 4: APPLICATIONS

J. Scheers, M. Vermeulen, C. de Maré and K. Meseure 647 Assessment of steel surface roughness and waviness in relation with paint appearance

A. Wennerberg 657 The importance of surface roughness for implant incorporation

S.-W. Kang, J.-S. Chen and J.-Y. Hung 663 Surface roughness of (110) orientation silicon based micro heat exchanger channel

X. Liu, D. G. Chetwynd and J. W. Gardner 669 Surface characterisation of electro-active thin polymeric film bearings

SESSION 5a: OPTICAL & OTHER MEASUREMENTS

M. Aketagawa, K. Takada, S. Sasaki, S. Suzuki, K. Kobayashi, K. Yamada and Y. Nakayama 677 Direct length comparison between regular crystalline lattice and SEM standard grating using dual tunneling unit STM

M. B. Kiran, B. Ramamoorthy and V. Radhakrishnan 685 Evaluation of surface roughness by vision system

J. C. Wyant and J. Schmit 691 Large field of view, high spatial resolution, surface measurements

E. Brinksmeier and O. Riemer 699 Measurement of optical surfaces generated by diamond turning

T. Y. Lin and G. S. Peng 707 Nanometrology of surface topography: application to the research in development of a new mass standard

SESSION 5b: OPTICAL & OTHER MEASUREMENTS

P. Gleyzes, V. Loriette, H. Saint-Jalmes and A. C. Boccara 715 Roughness measurements in the picometric range using a polarization interferometer and a multichannel lockin detection technique

A. Ya Grigoriev, S. A. Chizhik and N. K. Myshkin 719 Texture classification of engineering surfaces with nanoscale roughness

B. Nowicki and A. Jarkiewicz 725 The in-process surface roughness measurement using fringe field capacitive (FFC) method

S. Jakobs, A. Duparré and H. Truckenbrodt 733 AFM and light scattering measurements of optical thin films for applications in the UV spectral region

D. Prostrednik and P. H. Osanna 741 The Abbott curve—well known in metrology but not on technical drawings

Number 7

N. Itoh, H. Ohmori, S. Moriyasu, T. Kasai, T. Karaki-Doy and B. P. Bandyopadhyay 747 Finishing characteristics of brittle materials by ELID-lap grinding using metal-resin bonded wheels

S. C. Lin and M. F. Chang 763 A study on the effects of vibrations on the surface finish using a surface topography simulation model for turning

N. Olgac and M. Hosek 783 A new perspective and analysis for regenerative machine tool chatter

C.-S. Chen and A.-C. Lee 799 Design of acceleration/deceleration profiles in motion control based on digital FIR filters

F.-K. Chen and P.-C. Tszeng 827 An analysis of drawbead restraining force in the stamping process

M. S. Joun, S. W. Lee and J. H. Chung 843 Finite element analysis of a multi-stage axisymmetric forging process having a spring-attached die for controlling metal flow lines

K. Sheltami, S. Bedi and F. Ismail 855 Swept volumes of toroidal cutters using generating curves

F. Caiazzo, G. S. Palazzo and R. Pasquino 871 The influence of working parameters on the response of a capacitive sensor used in-process for the measurement of tool wear

Number 8

Q. Peng and M. Loftus 881 A new approach to reverse engineering based on vision information

J. Lee 901 Teleservice engineering in manufacturing: challenges and opportunities

Y. Park, T.-Y. Kim, J. Woo, D. Shin and J. Kim 911 Sliding mode cutting force regulator for turning processes

J. C. Choi, B. M. Kim, H. Y. Cho and C. Kim 931 A compact and practical CAD system for blanking or piercing of irregular-shaped sheet metal products and stator and rotor parts

M.-y. Yang and J.-h. Park 965 Analysis of setting errors in precision ballscrew machining and the automatic adjustable center

F. R. Biglari, N. P. O'Dowd and R. T. Fenner 981 Optimum design of forging dies using fuzzy logic in conjunction with the backward deformation method

V. Ivanov, G. Nankov and V. Kirov 1001 CAD orientated mathematical model for determination of profile helical surfaces

Number 9

Jin Kyung Choi and Dai Gil Lee 1017 Thermal characteristics of the spindle bearing system with a gear located on the bearing span

Jeong-Du Kim, Yan-Meng Xu and Youn-Hee Kang 1031 Study on the characteristics of Magneto-Electrolytic-Abrasive Polishing by using the newly developed nonwoven-abrasive pads

H. D. Kwon and M. Burdekin 1045 Adjustment of CNC machine tool controller setting values by an experimental method

J. Q. Xie, A. E. Bayoumi and H. M. Zbib 1067 FEA modeling and simulation of shear localized chip formation in metal cutting

B. M. Imani, M. H. Sadeghi and M. A. Elbestawi 1089 An improved process simulation system for ball-end milling of sculptured surfaces

C. F. Wong, J. Shippen and B. Jones 1109 Neural network control strategies for low specification servo actuators

V. Ivanov and G. Nankov 1125 Profiling of rotation tools for forming of helical surfaces

Numbers 10–11

M. Shiomi, Y. Itakura, K. Mori and K. Osakada 1149 Finite element analysis of liquid ejection in continuously cast slab by sequential forging

Q. Meng, J. A. Arsecularatne and P. Mathew 1165 Prediction of the cutting conditions giving plastic deformation of the tool in oblique machining

M. S. Joun, J. H. Chung and R. Shivpuri 1183 An axisymmetric forging approach to preform design in ring rolling using a rigid–viscoplastic finite element method

J. C. Choi and Y. Choi 1193 A study on the forging of external spur gears: upper-bound analyses and experiments

E. Marui, S. Ema, M. Hashimoto and Y. Wakasawa — 1209 Plate insertion as a means to improve the damping capacity of a cutting tool system

E. C. De Meter — 1221 Fast support layout optimization

Chenggang Che and Jun Ni — 1241 A generic coordinate transformation uncertainty assessment approach and its application in machine vision metrology

D. T. Pham and R. S. Gault — 1257 A comparison of rapid prototyping technologies

M. Mahdi and L. Zhang — 1289 Applied mechanics in grinding—VI. Residual stresses and surface hardening by coupled thermo-plasticity and phase transformation

Jeong-Du Kim and Dong-Sik Kim — 1305 Waviness compensation of precision machining by piezo-electric micro cutting device

Hong-Tzong Yau — 1323 Uncertainty analysis in geometric best fit

Tao Luo, Wen Lu, K. Krishnamurthy and B. McMillin — 1343 A neural network approach for force and contour error control in multi-dimensional end milling operations

G. Galante, A. Lombardo and A. Passannanti — 1361 Tool-life modelling as a stochastic process

F. J. Nieto, J. M. Etxabe and J. G. Giménez — 1371 Influence of contact loss between workpiece and grinding wheel on the roundness errors in centreless grinding

Z. J. Pei and P. M. Ferreira — 1399 Modeling of ductile-mode material removal in rotary ultrasonic machining

Number 12

I. Tansel, O. Rodriguez, M. Trujillo, E. Paz and W. Li — 1419 Micro-end-milling—I. Wear and breakage

I. Tansel, A. Nedbouyan, M. Trujillo and B. Tansel — 1437 Micro-end-milling—II. Extending tool life with a Smart Workpiece Holder (SWH)

I. Tansel, M. Trujillo, A. Nedbouyan, C. Velez, Wei-Yu Bao, T. T. Arkan and B. Tansel — 1449 Micro-end-milling—III: Wear estimation and tool breakage detection using acoustic emission signals

Chung-Shin Chang — 1467 A force model for nose radius worn tools with a chamfered main cutting edge

I. S. Yun, W. R. D. Wilson and K. F. Ehmann — 1499 Review of chatter studies in cold rolling

M. V. Ramesh, K. N. Seetharamu, N. Ganesan and M. S. Sivakumar — 1531 Analysis of machining of FRPs using FEM
